

Oil Analysis & Industrial Lubrication Management

**For many years you have known Precise
Lubrication provides Oil Analysis**

But did you know we also provide:

- Contamination and oil sampling products.
- Filtration solutions including supply, design and fitting.
- Headspace management including breathers, desiccant breathers, vents, plugs, etc.
- Single & multi-point automatic grease lubricators prefilled or filled with your own grease in sizes from 30cc through to 500cc.
- Single point oil lubricators filled with your own oil.
- Lubrication engineering assistance covering everything from lube audits through failure analysis and root cause analysis, lube surveys to machine reliability improvement initiatives.
- Training in all facets and aspects of lubrication.
- Lubricant rationalisation.
- P/M Lube services covering oiling and greasing on both ad hoc and contract basis.
- Lube room design and installation.
- Quality lubricants from a range of suppliers covering mineral, food grade, environmentally friendly and synthetic technologies.
- Product changeover procedures.
- Gear inspections.
- Hydraulic inspections.
- Oil report management.
- Best practice knowledge transfer.
- On-line and Off-Line filtration services on both sale and hire basis.
- Fitting dedicated oil sampling ports and oil sampling equipment.
- Ferrography (tribology/microscopic wear debris analysis).
